

Church and Religious Facilities

The opportunity to provide Architectural Services for a Place of Worship or any related structure is a privilege regardless of the size of the project or the religious affiliation. Decker & Associates will analyze your building program and provide you with a design to meet your needs, your budget, and create an image that reflects your mission. We will work with your contractor or recommend a contractor that has extensive experience with building religious facilities.

Our goal is to provide the most cost efficient facility possible.
